

JUMPKING[®] TRAMPOLINE *Basketball Hoop* with Basketball Model: ACC-BHBMGN

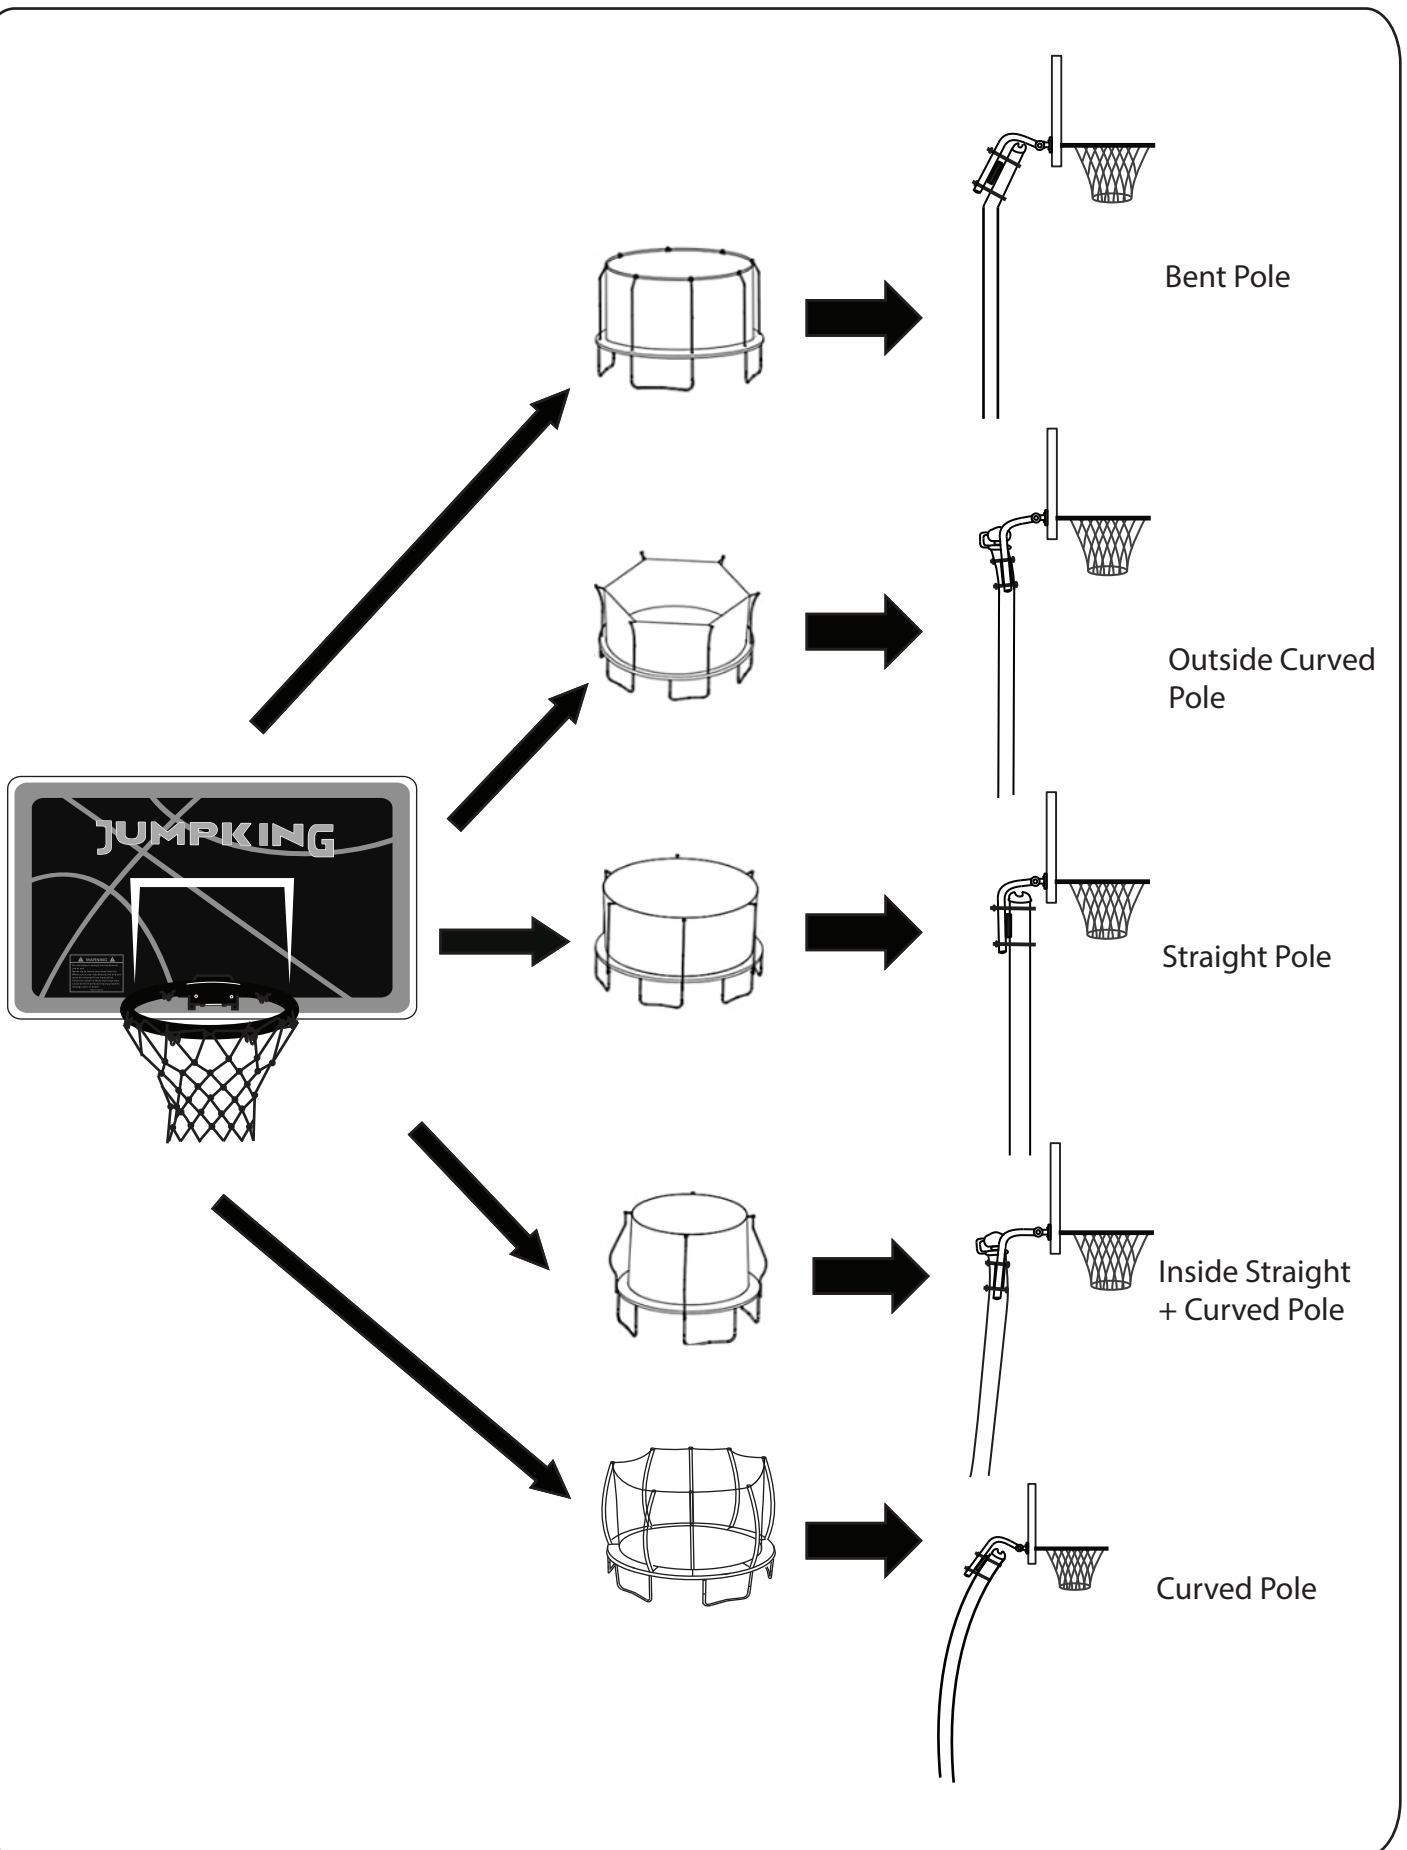

WARNING!

- Please read all instructions prior to assembly.
- Adult supervision is required during assembly.
- Assembly requires 2 people.
- Use gloves during assembly to protect hands from pinch points and sharp edges.
- Check for any loose nuts and bolts, then tighten if necessary.
- Check all caps and coverings for defects or deterioration. Replace if necessary.
- Inspect the basketball hoop before each use and replace any worn, defective or missing parts.
- This basketball hoop is not suitable for assembly on an enclosure pole with a tunnel sleeve.
- For proper fit and grip during assembly, the enclosure pole should be covered with a foam sleeve.

<p>HWUBOLT Part M</p>  <p>Description: U-Bolt Bracket Quantity: 2 pcs</p>			

Assemble the breakaway Rim to basketball board

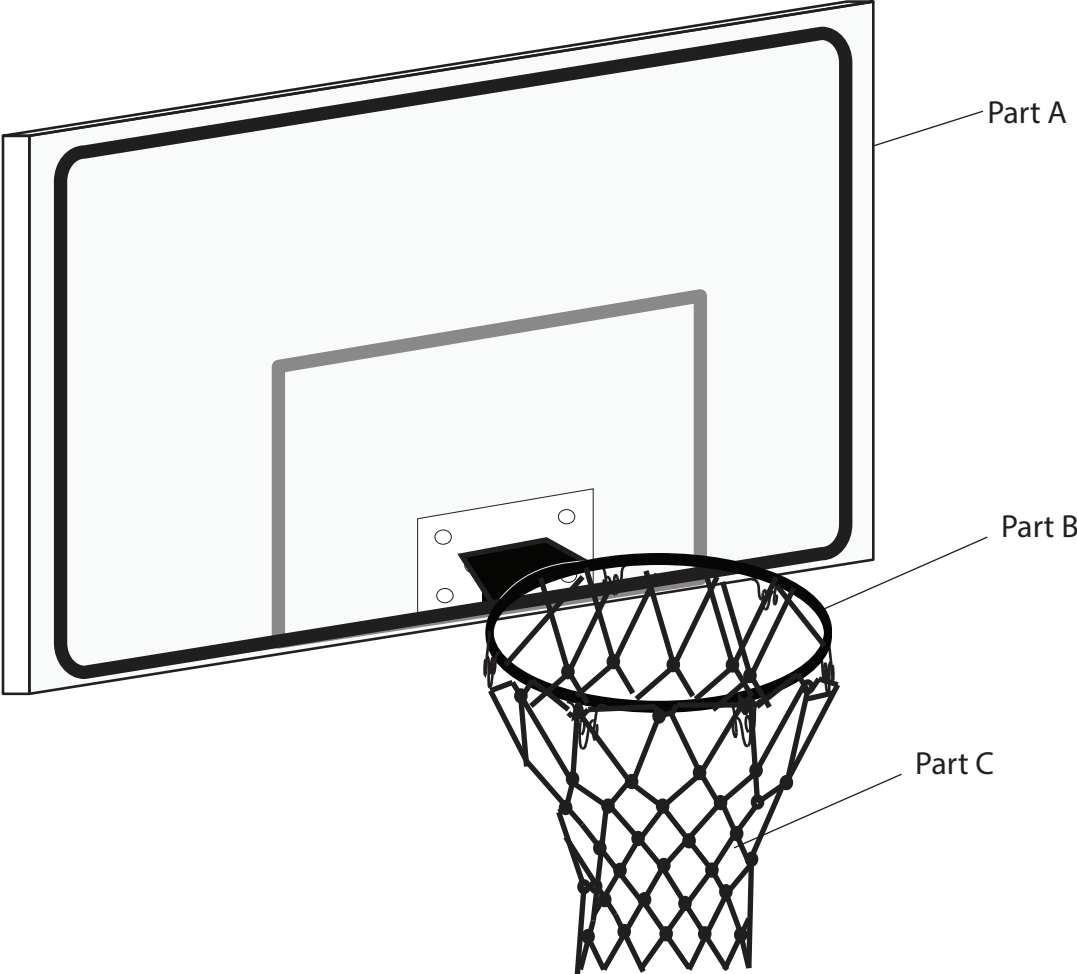

1) Insert the screws Part I into holes of Breakaway Rim Part B.

2) Then insert the screws through the basketball board Part A.

3) Using wrench to tighten the nuts on back of board. (Wrench not provided)

Assemble the basketball net to the breakaway Rim

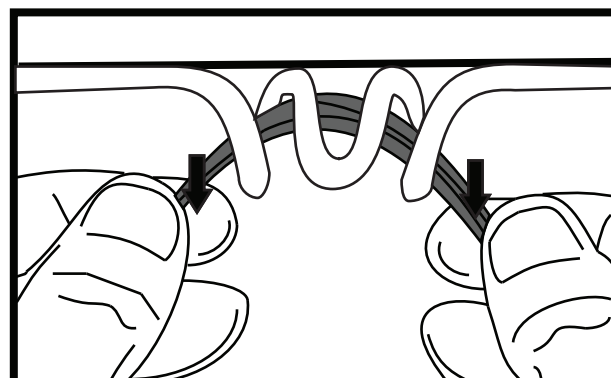

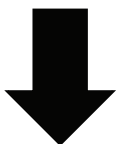

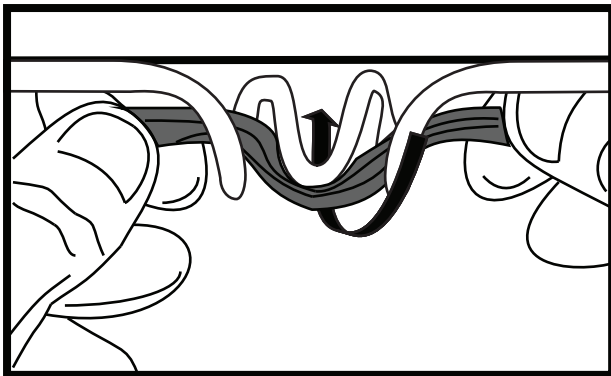

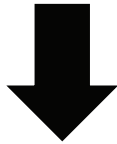

The diagram shows two ways to attach the basketball net to the rim. On the left, a large checkmark is placed above a net that is correctly attached to the rim with a large mesher. On the right, a large X is placed above a net that is incorrectly attached to the rim with a small mesher.

Note: Attach the basketball net Part C with large mesher to the rim.

Part C

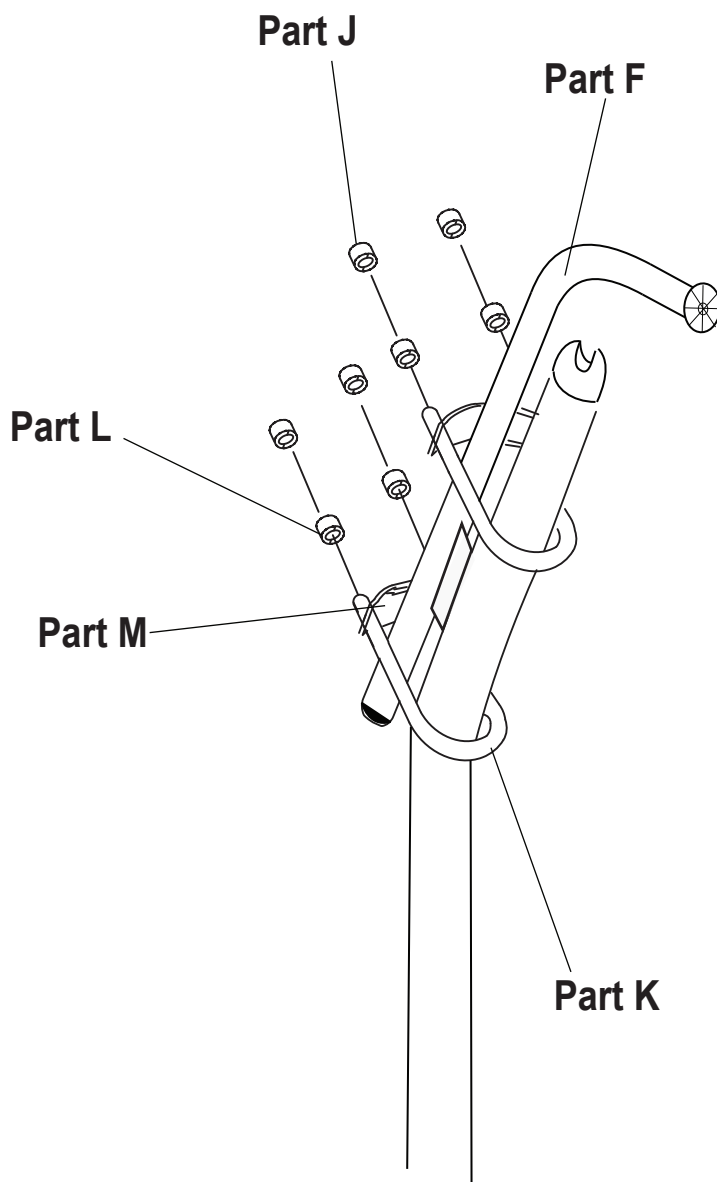

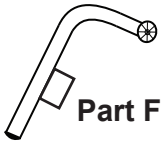

Part B

Assemble basketball hoop onto enclosure pole

You will need the following parts to complete this step:

- 1 x "7" shape tube - Part F
- 4 x Plastic Nut Cap – Part J
- 2 x U-bolt - Part K
- 4 x Lock Nut - Part L
- 2 x U-Bolt Bracket – Part M

Align the basketball hoop onto one of the trampoline enclosure poles. Make sure the position of the basketball hoop is facing inward. Start attaching the U-bolts followed by the wedges, U-bolt brackets and lock nuts. Tighten with socket wrench (not included). Then place plastic nut caps over lock nuts.

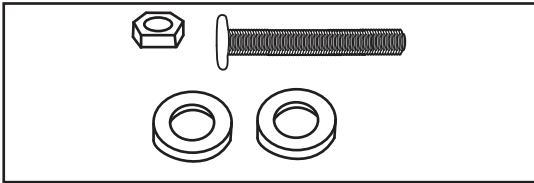

You will need the following parts to complete this step:

1 x Basketball Board and Hoop - Part A

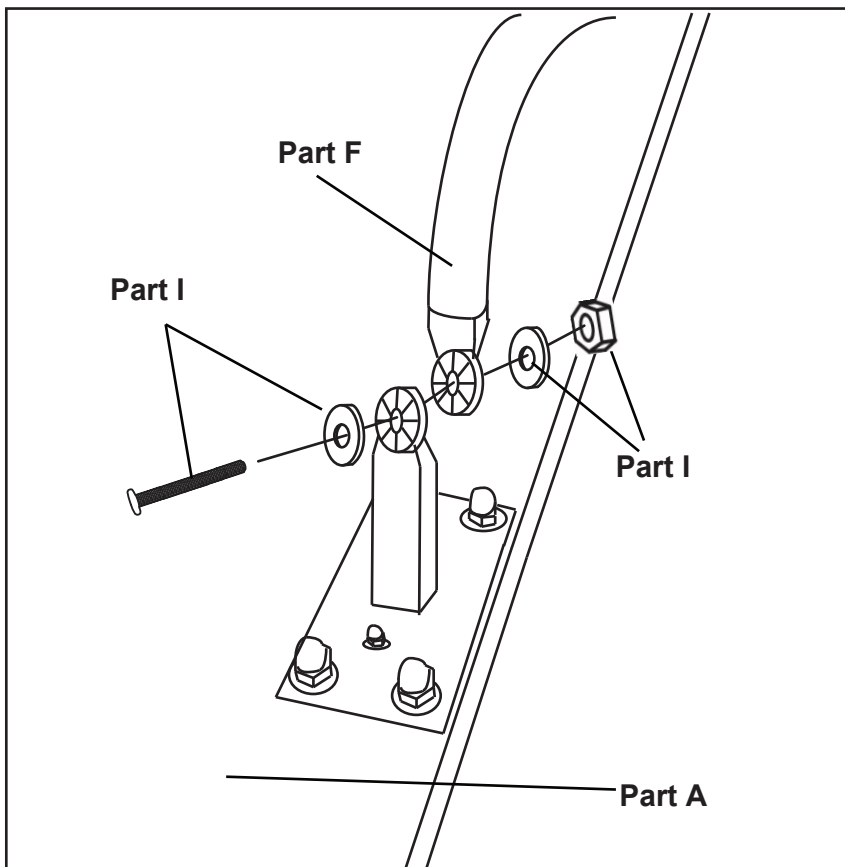

4 x Screw and nut set for Basketball back board - Part H (preassembled to Part A)

1 x Screw, nut and washer set for Basketball back board - Part I

Part I

Insert "7" Shape tube end into back of Basketball Board. Align the holes and insert the screw, washer and nut and secure in place.

Note: Please adjust to appropriate angle of basketball board before tighten the screw and nut securely.
